

## GERIATRIC MEDICINE FELLOWSHIP PROGRAM

---

### Class of 2022 - Inaugural Fellow

#### **Monica Chung, MD**

Residency: HonorHealth Family Medicine

Monica is a native to Phoenix and chose to go into medicine to care for her community. After graduating from the University of Arizona with a degree in Molecular and Cellular Biology, she went to the University of Arizona College of Medicine in Phoenix. She is proud to say that she's a Wildcat for life!

Being a family medicine resident at HonorHealth has truly shaped her medical training. What drew her to HonorHealth is the organization's longstanding presence in the community, diversity of patients cared for, and our commitment to help our patients overcome barriers to healthcare. This is why she has chosen to continue her training as a geriatric fellow within HonorHealth so that she can continue building upon her knowledge and skills to care for older adults in our community.

When she's not at work, you can find her baking a new recipe, spending time with family, and finding balance through yoga.
