You'll be placed in the Virtual Waiting Room.

Wait here and your provider will be with you shortly!

Tips for a successful video visit

- ✔ Complete eCheck-In and your hardware test, both of which must be done before you can start your video visit. You can complete eCheck-In up to seven days before your visit.
- ✔ Do not drive during your video visit. If you are driving during a video visit, your provider will end the visit immediately for your safety.
- ✔ Be sure you have a strong WiFi or LTE connection.
- ✔ Make sure your space is private, so you can discuss personal medical information.
- ✔ Sit in a well-lit room so your provider can see you well.
- ✔ Have your blood pressure cuff, thermometer and medications close by, as needed.
- ✔ Refresh your screen if you experience any audio or visual problems.
- ✔ Avoid switching to other apps while you're on hold.
- ✔ Turn off background television or radio noise.
- ✔ Write down any questions for your provider before your visit.
- ✔ Have paper and a pen ready so you can take notes.
