

# HonorHealth PGY2 Ambulatory Care Pharmacy Residency

## Purpose Statement:

The PGY2 ambulatory care pharmacy residency program builds on Doctor of Pharmacy (Pharm.D.) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of ambulatory care practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete an accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification in ambulatory care.

## PGY2 Ambulatory Care Pharmacy Residency Program Structure

Learning Experiences	Duration	Training Site	Place in Residency

Advanced Core	4 weeks	Varies	Varies

\* The 3 week required Orientation may be abbreviated, if the PGY2 resident has already completed a PGY1 residency program with HonorHealth.

\*\*Rotation experience will include co-preceptorship from a physician partner. Pharmacist preceptor coordinates the experience and completes formal evaluation.

†Elective rotation assignments are dependent upon preceptor and practice site availability.
