

## ResQIPS (Research, Quality Improvement and Patient Safety)

HonorHealth is committed to advancing research, quality improvement (QI) and patient safety (PS) as an important aspect of graduate medical education and faculty/preceptor development. The ResQIPS program aims at supporting scholarship for the HonorHealth residents, fellows, faculty and other interprofessional learners across the HonorHealth network.

### Program Components

Institutional resources for improving resident, fellow and faculty scholarship include:

- ResQIPS program coordination
- Medical library services
- Statistical and data analytics support
- Champions and mentorships
- Quality improvement
- Continued medical education (CME)
- Institution Review Board (IRB)

### Program Services: Training, Mentorship, and Outcomes

- Availability and direct contact
- Assistance with interdisciplinary networking and collaboration
- Access to templates and quick reference resources
- Guidance on project design based on internal institutional performance data and strategic initiatives
- Biostatistician and search strategy consultation
- Identify compatible coaches, mentors, and editorial reviewers
- Visiting scholars with international reputations on various topics
- Remote access to electronic content
- Supportive project management in all phases of research, training, and scholarly activity
- IRB process direction and support
- Bridge LMS assistance and management
- Publishing and dissemination advice (scholarly journals and conferences lists)
- Regional and national meetings poster guidance and encouragement
