

INTERVENTIONAL CARDIOLOGY FELLOWSHIP PROGRAM

Fellow

Class of 2026

**Mitra Patel, MD**

Fellowship: General Cardiology - University of Toledo

Residency: Internal Medicine - University of Toledo

Medical School: Northeast Ohio Medical University

I was raised in Columbus, Ohio and was accepted to a 6-year BS/MD program at Northeast Ohio Medical University. After that, I completed my internal medicine residency and cardiology fellowship at the University of Toledo, where I served as both an associate chief internal medicine resident and chief cardiology fellow before coming to HonorHealth for my interventional cardiology training. I am deeply passionate about the field of interventional cardiology because it represents the intersection of technical precision, rapid decision-making, and meaningful patient impact. My clinical interests include complex coronary interventions, intravascular imaging, mechanical circulatory support, and structural heart procedures.

I was drawn to HonorHealth immediately due to the opportunity of being mentored by renowned interventional cardiologists and being a participant in delivering the most up-to-date evidence-based care with its state-of-the-art facilities. I was instantly drawn to HonorHealth's culture of collegiality and academic rigor, and its focus on innovation aligns perfectly with my goals of mastering complex coronary and structural interventions. I am eager to contribute not only as a learner, but also as a compassionate clinician and team player who values trust, precision, and excellence in care.

Outside the cardiac catheterization lab, I enjoy music, playing any type of sport, traveling the world, and creating new memories with my family and friends.
