

## Orthopedic Service Line Co-Management Agreement Disclosure

On July, 1, 2018, HonorHealth and nearly 90 valley orthopedic surgeons created an agreement that called for the health system to share a portion of cost savings attributed to quality enhancement in the orthopedic program with the surgeons.

The program has been modeled after other successful programs from the Center for Medicare and Medicaid Innovation and prestigious healthcare institutes in the U.S.

This arrangement brings physicians and hospitals together to collaborate on areas that include:

- Quality monitoring and improvement.
- Improved care coordination.
- Sharing best practices.

Nationally, similar arrangements have resulted in reducing:

- Improved access to care.
- Adoption of national best practices.
- Improved patient satisfaction.
- Physician communication.

The HonorHealth program calls for collaboration with physicians to:

- Lower readmission rates and major complication rates for total knee and hip replacements.
- Educate the medical staff regarding orthopedic and spine care and procedures.
- Reduce costs for supplies related to total knee and hip arthroplasty procedures.

The physicians are not required to follow any of the requirements of the program if doing so is not in their best interest. For information about the program, contact Michael Piver, HonorHealth Associate Vice President Orthopedic Service Line at [michael.piver@honorhealth.com](mailto:michael.piver@honorhealth.com).

The following physicians are participating in orthopedic co-management:

Abrams, Josh – Orthopedic Surgeon	Desert Institute for Spine Care
Bailie, David – Orthopedic Surgeon	Arizona Institute for Sports, Knees and Shoulders
