

Breast Health and Research Center

Imagine a place where you get your mammogram and know results the same day if you have found a lump or have a concern—where follow-up tests are scheduled right away, and results are typically received within 24 hours.

HonorHealth's Breast Health and Research Center gives you all of this in a caring, comfortable setting—along with state-of-the-art diagnostic tools and interventional technologies. From routine mammograms to advanced interventional procedures, you'll encounter breast healthcare that's comprehensive, comfortable and convenient.

Less Time Waiting, Worrying

For mammography, you'll be seen within one week of calling for an appointment. If you're already experiencing a problem, we'll offer mammography within 72 hours.

You'll receive your diagnostic exam results at your appointment, and if a biopsy is needed, we'll perform the biopsy within 24 to 48 hours of scheduling the appointment. Test results are typically back in 24 hours. If surgery is required, you can be scheduled to see a breast surgeon.

Breast Health and Research Center Locations

- **Deer Valley Medical Center**
19646 N. 27th Ave., Suite 205

Phoenix, AZ 85020

Services vary by location. Call 623-780-HOPE (4673) for more information.

We're There for You

A cancer diagnosis and navigating the healthcare system can be challenging. Our Patient Navigators will help you understand your diagnosis, get access to timely care and connect you with social support. You will never have to go through this journey alone.

Early Detection is Key

At HonorHealth's Breast Health and Research Center, we know cancer is most treatable in its earliest stage, and that its earliest detection depends on experienced, dedicated breast care specialists using the latest technology.

Our radiologists and technologists use low-dose 3D screening and diagnostic mammography, along with breast MRI, ultrasound-guided, stereotactic and MRI biopsies.

For an appointment at any of our locations,
call 623-780-HOPE (4673)
or visit [honorhealth.com/breasthealth](https://www.honorhealth.com/breasthealth).

What is Low-Dose 3D Digital Mammography?

The Breast Health and Research Center offers low-dose 3D mammography. This allows detection of very small cancers, even in denser breast tissues. This also allows the physicians to be much more confident when ruling tissue cancer free. 3D technology has resulted in a significant decrease in the number of callbacks for follow-up imaging.

Breast Cancer Support Groups

Healing from breast cancer doesn't just happen physically. It needs to happen emotionally as well. At HonorHealth's Breast Health and Research Center, caring support groups provide an environment for emotional healing, strength and renewal.

By choosing the support group that best meets your needs, you will be able to gather valuable information, encouragement and make a few new friends along the way. Check out our free upcoming support groups and events at [HonorHealth.com/events](https://www.honorhealth.com/events).

Meet Our Breast Care Specialists

Linda Greer, MD - Breast Center Medical Director Linda Greer, MD, earned her BS degree at the University of Arizona and her MD at the University of Texas Medical Branch in Galveston, Texas, where she also completed a residency in diagnostic radiology. A board-certified diagnostic radiologist, Dr. Greer has specialized in breast imaging since 1996. She is an international speaker on advancing technology in womens imaging.

Hedieh Saghari, MD - Board-certified radiologist Hedieh Saghari, MD, earned her MD in Tehran, interned in Boston, completed the diagnostic radiology residency program at St. Joseph's Hospital, a fellowship in neuroradiology at Barrow Neurological Institute and a fellowship in mammography at Maricopa Medical Center. Dr. Saghari holds a certificate of added qualification in neuroradiology, and is qualified to read brain and spine MRIs.

Michael Alpern, MD - Board-certified radiologist Michael Alpern earned his MD at Wayne State University School of Medicine, Detroit. He completed a residency in diagnostic radiology at Henry Ford Hospital, Detroit, and a fellowship in digital imaging at the Medical College of Wisconsin, Milwaukee. Dr. Alpern has expertise in digital mammography, breast ultrasound and MRI, and in using imaging guidance for pre-operative localizations and breast biopsies.

WELCOME TO HONORHEALTH, YOUR PARTNER IN CARE

HonorHealth was formed by a merger between Scottsdale Healthcare and John C. Lincoln Health Network. HonorHealth's mission is to improve the health and well-being of those we serve. The healthcare system encompasses:

Five acute-care hospitals:

- Deer Valley Medical Center.
- John C. Lincoln Medical Center.
- Scottsdale Shea Medical Center.
- Scottsdale Thompson Peak Medical Center.
- Scottsdale Osborn Medical Center.

Specialized patient care:

- Breast Health and Research Center.
- Greenbaum Specialty Surgical Hospital.
- HonorHealth Medical Group.
- Piper Surgery Center.
- Research Institute.
- Sonoran Health and Emergency Center.
- Virginia G. Piper Cancer Center.
- Virginia G. Piper Pediatric Center of Excellence - Children's Emergency.
- Extensive specialty care physician practices, outpatient treatment and surgery centers, rehabilitation, medical imaging and much more.

Foundations and community services:

- Adult Day Health Care.
- Children's Dental Clinic.
- Community Health Center.
- Desert Mission Food Bank.
- John C. Lincoln Health Foundation.
- Lincoln Learning Center.
- Marley House Behavioral Health Clinic.
- Neighborhood Outreach and Access to Health.
